## Evening Brief

Date: Monday July 30<sup>th</sup>, 2018

---

### Weather Summary

\*\*\* High Risk for Lightning Tue-Wed Idaho/NE Nevada/NW UT \*\*\*

\*\*\* High Risk for Gusty Winds/Low RH Thu-Fri Idaho and Nrn UT \*\*\*

After a prolonged period of hot and dry conditions, chances of thunderstorms with **critical lightning** will increase across most of Idaho and NE Nevada and NW UT Tue-Wed, with moisture moving northward along the Nevada/Utah border from south to north, and another wave with moisture moving out of Southern Oregon into much of Idaho, where fuels are the driest. This will be followed by a strong upper low pushing down from the Pacific NW with **strong winds and drier conditions** for much of ID and parts of Northern Nevada and UT later in the week.

Further south, hot and dry conditions across central Utah and Nevada is aiding in new fire activity. There should be some showers in those areas by later in the week.

---

### Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	5	Light Initial Attack Activity
National	5	New Fires and Acres: 20 fires 270.5 acres; 62,539 acres large fire growth

---

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

**Fuels and Fire Behavior advisory has been issued for [Northern Great Basin](#)**

### Fuels/Fire Potential

ERC's are still near or below the 50th percentile across the southern third of Nevada, Utah, into the AZ Strip, but even there, drier pockets are beginning to emerge, along with an occasional lightning holdovers, and reemergence of old fires from earlier this season. ERC's are mainly in the 70th to 80th percentile across Northern parts of NV and UT and even drier, across Idaho, where many stations are now at or above the 90th percentile. Wyoming ERC's also steadily rising into the 60th-70th percentiles with locally higher ERC's. Live Fuel Moisture levels across most areas are near late July normals, and grasses are cured in just about all areas, except the highest elevations above 7000 ft. in Idaho and Western Wyoming.

### Resources:

#### Aviation within the Great Basin

- o 0 VLAT's, 5 LATs, 4 CL-415
- o 20 SEATs, 2 Fire Bosses
- o 11 Type 1 Helicopters / 11 Committed
- o 11 Type 2 Helicopters / 11 Committed
- o 22 Type 3 Helicopters

#### Crews Committed within the Great Basin

- o 9 IHCs Committed / 0 Available
- o 33 T-2 IAs Committed / 0 Available
